# CALL FOR BOOK CHAPTERS

## Book Title

**Unmanned Aerial Vehicle Networks: Communications and Cybersecurity Challenges**

## Editors

### **Hafiz Muhammad Attaullah**

NanoTechx Inc. & Faculty of Computing and Informatics, Multimedia University, Malaysia

Email: [attaullah@ieee.org](mailto:attaullah@ieee.org)

### **Dr. Inam Ullah Khan**

Fazaia Bilquis College of Education for Women's, Nur Khan Base, Air University, Pakistan And Multimedia University, Malaysia

Email: [inamullahkhan@mmu.edu.my](mailto:inamullahkhan@mmu.edu.my)

### **Dr. Keshav Kaushik**

Center for Cyber Security and Cryptology, Sharda School of Computer Science & Engineering, Sharda University, Greater Noida, Uttar Pradesh, India

Email: [officialkeshavkaushik@gmail.com](mailto:officialkeshavkaushik@gmail.com)

### **Dr. Al-Sakib Khan Pathan**

Department of Computer Science and Engineering, United International University, Bangladesh

Email: [sakib\\_pathan@yahoo.com](mailto:sakib_pathan@yahoo.com)

### **Dr. Ahthasham Sajid**

Fazaia Bilquis College of Education for Women's, Nur Khan Base, Air University, Pakistan And Multimedia University, Malaysia

Email: [ahthashamsajid@gmail.com](mailto:ahthashamsajid@gmail.com)

## Table of Contents

**Chapter 01:** The Evolution of UAV Networks and Their Role in Modern Communication

**Chapter 02:** Fundamentals of UAV Network Architecture and Design

**Chapter 03:** UAV Hardware Fundamentals and Network Integration

**Chapter 04:** Communication Protocols for UAV Networks: Bridging Air and Ground

**Chapter 05:** Latency, Scalability, and Fault Tolerance: Key Challenges in UAV Network Design

**Chapter 06:** Scalable UAV Networks: Solutions for Large-Scale Deployments

**Chapter 07:** Autonomous UAV Networks: The Next Frontier in Communication and Security

**Chapter 08:** Cybersecurity in UAV Networks: Protecting the Skies

**Chapter 09:** Securing UAV Communications: Encryption, Trust, and Intrusion Detection

**Chapter 10:** Blockchain as a Security Solution for UAV Networks

**Chapter 11:** Cyber Resilience in UAV Networks: Responding to Emerging Threats

**Chapter 12:** Regulatory Challenges in UAV Network Security

**Chapter 13:** The Global Landscape of UAV Network Security: International Perspectives

**Chapter 14:** The Integration of 5G, IoT, and AI for Enhanced UAV Connectivity

**Chapter 15:** Machine Learning for Optimizing UAV Network Performance and Security

**Chapter 16:** Edge Computing in UAV Networks: Enhancing Real-Time Data Processing

**Chapter 17:** Innovations in UAV Swarm Communication: Collective Intelligence and Security

**Chapter 18:** Future Trends in UAV Communication: From 6G to Quantum Networks

**Chapter 19:** Real-World Applications: UAV Networks in Disaster Management and Surveillance

**Chapter 20:** The Role of UAV Networks in Smart Cities and Urban Management

**Chapter 21:** Application-Specific UAV Communication System Design

**Chapter 22:** Flying Ad-hoc Networks (FANETs) and Software Defined Networking (SDN) for UAV Communication

**Chapter 23:** Environmental Sustainability and Energy Efficiency in UAV Networks

**Chapter 24:** Cross-Cutting Themes: Regulation, Ethics, and Emerging Technology Intersections

**Chapter 25:** Simulation Frameworks, Algorithms, and Code Implementations for UAV Communication and Security

## IMPORTANT DATES

- Abstract Submission: 15th October 2025
- Full Chapter Submission: 30th November 2025
- Acceptance Notification: 28th December 2025

No Submission or Publication Fee

AI Content must be 0% and plagiarism up to 10% only.
